

*The climate of the Lithuania can be described as typical European continental influenced climate with warm, dry summers and fairly severe winters. The average temperature in summer daytime can reach 17-25°C, but sometimes quite higher, 30°C or more. In most of the time it is dry weather with sunny spells, rain often falls with sometimes heavy thunderstorms that can occur at the end of the day. July is the warmest month with an average Temperature of 18°C. January is the coldest month with daytime temperatures usually around -5°C, but in some cases winter months can be quite colder with temperatures far below zero, about -20°C or lower and strong, cold northeasterly winds. Heavy snowfall or even snowstorms are also possible on some days. The weather is often breezy and humid due to the proximity of the Baltic Sea.*
